EDUCATION

University of Houston, Cullen College of Engineering| Houston, TX — Cumulative GPA: 3.447/4.000

Bachelors of Science in Mechanical Engineering, Minor in Aerospace Engineering — Graduation Date: May 2028

SUMMARY

Mechanical Engineering student with hands on experience in delivering manufacturable prototypes for engineering clients, working at Boeing as a ATCS intern and at NASA in Mission Control. Skilled in CAD design/drawings, data analysis, and MATLAB coding. Seeking a Summer 2027 Mechanical Engineering Internship.

SOFTWARE / TECHNICAL SKILLS

CAD: Autodesk Fusion, Inventor, Onshape, AutoCAD, Thermal Desktop, SolidWorks, 3D Printing, and Resin Printing.

Programming and Computing: MATLAB, Python, Arduino Coding, Microsoft Office Suite, Signal processing.

Certifications: Autodesk Fusion**| Skills / Expertise:** TIG Welding, Stick welding, Mechanical Design, experimental testing, prototyping, Soldering, Circuit building, Leadership, Organization, Teamwork & Communication, Data Science & Analytics, and Critical Thinking & Reasoning.

WORK EXPERIENCE

Boeing | Houston, TX — June 2026 – Ongoing

Active Thermal Control (ATCS) Intern

- Develop MATLAB codes for ISS ATCS systems, integrated 7 systems providing automated data acquisition and a user-friendly GUI optimizing plotting time and creating organized plots for presentations/daily dashboard.
- Supports NASA missions in Mission Control during EVAs and ATCS operations, monitoring ATCS systems while watching Astronauts perform real time operations guiding when needed.

Cefaratti Ventures | Houston, TX — Jan 2026 – May 2026

Mechanical Engineering Intern (Independent contractor)

- Delivering functional prototypes for medical-device clients who contract us to bring their ideas to real life. Developing manufacturing ready CAD designs/drawings to the end customers.

Wind Tunnel lab, University of Houston| Houston, TX — May 2025 – May 2026

Undergraduate Researcher

- Implementing the professor's projects into reality, Delivered 2 major lab projects (Wind tower Instrumentation and Constant temperature anemometer. Optimized Bill of Materials for Wind tower reducing system costs by 30%, while creating reproducible/reliable systems lasting for 3+ years.

ENGINEERING / RESEARCH PROJECT

Full Size Formula 1 Electric car | Personal Project | Houston, TX — June 2026 -- Ongoing

University of Houston

- Designed and fabricated a F1 car chassis using 1" x 1" 14-gauge square steel tubing by **stick welding**, designed drive train system, steering, hydraulic braking, and hardware including a 72V 3kW motor.
- Fabricated F1 style body work, using 3d printing and fiberglass molding optimizing a lightweight chassis.
- **Link to Project in Portfolio:** Electric Formula 1 car

Go - Kart project| American Society of Mechanical Engineers (ASME UH) | Houston, TX — March 2026 – April 2026

University of Houston

- Led a Go kart project for ASME UH, racing A&M ASME, placed 3rd in race with the car running 5 trials.
- Taught 20+ students how to **TIG weld** a go kart chassis, demonstrated techniques in cutting metal tubes.
- Oversaw sub teams (Drive-train, Steering, braking, throttle control, front/rear axle assembly) optimizing vehicle performance.
- **Link to Project in Portfolio:** Go - Kart Project

Wind Tunnel lab, University of Houston| Houston, TX — May 2025 – May 2026

Undergraduate Researcher

- **Wind tower Instrumentation: Link to Project in Portfolio:** Static Pressure Measurement System
- **Constant temperature anemometer: Link to Project in Portfolio:** Constant Temperature Anemometer Project

LEADERSHIP AND COMMUNITY SERVICE

University of Houston – American Society of Mechanical Engineers (ASME UH) | Houston, TX — Fall 2025 – May 2026

Projects Officer

- Responsible for managing technical projects and budgets. Taught engineering students more about electronics, coding, and manufacturing giving resume/skill growth.

Eagle Scout Project - Four Storage Shelves for Religious Organization | Sugar Land, TX — Jun 2023 – Nov 2023

- Engineered and built 4 wooden storage shelves, increasing the storage capacity by 40%, increased the efficiency for a kitchen serving 150+ individuals. Led a team of 5 scout volunteers, mentored them in handling power tools like drilling, circular saws.

HONORS / AWARDS

- Highschool Academic Excellence award (2020-2024)
- Eagle Scout (Dec 2023)
- Boy Scout Order of Arrow (Dec 2022)
- Dean's List (Fall 2024 – Spring 2025)
